Our very own context manager!

Simple!

```python
class MyContextManager:
    def __enter__(self):
        print("Enter!")

    def __exit__(self, *exc):
        print("Exit!")

with MyContextManager():
    print("Inside the block!")
```

Our very own context manager!

Super simple!

```python
class MyContextManager:
    def __enter__(self):
        print("Enter!")

    def __exit__(self, *exc):
        print("Exit!")

with MyContextManager():
    print("Inside the block!")
```

Output:
Enter!
Inside the block!
Exit!
